

NEON POTHOS

plant care sheet

LIGHT

Thrives in bright, indirect light.

TEMPERATURE

The ideal temperature range is 70°F to 90°F (21°C to 32°C).

WATERING

Keep the soil moist but not soggy.

HUMIDITY

Grows best in high humidity. The bathroom is a good location for NP.

PROPAGATION

Neon Pothos is best propagated through stem cuttings.

GROWTH

Neon Pothos grow at a moderate rate. The more light they receive, the quicker they will grow.

TOXICITY

Neon Pothos is toxic to both cats & dogs. Keep away from pets.

SOIL

For best results, use well-draining soil. Neon Pothos is not picky about soil, though.

(RE)POTTING

Repot your Neon Pothos every other year. Use pots with drainage holes.

PESTS

Neon Pothos plants are at risk of mealybugs and scale insect infestations. Spraying with neem oil or using rubbing alcohol will help getting rid of these intruders.

FERTILIZER

Use a liquid fertilizer at half-strength during growing season.

COMMON PROBLEMS

YELLOW LEAVES: Yellow leaves on any houseplant are often a result of overwatering. Reduce watering to solve this issue.

ROOT ROT: Root rot in Pothos plants is typically caused by overwatering. Other possible reasons are fungal infections or overfertilization.
