

# DRACAENA FRAGRANS

## plant care sheet

### LIGHT

Grows best in bright, indirect sunlight.

### TEMPERATURE

The ideal temperature range is 60°F to 75°F (15°C to 24°C).

### WATERING

Water as soon as the top 1-2 inches of the soil dry out.

### HUMIDITY

Dracaena fragrans thrives in average humidity (40-50%).

### PROPAGATION

Dracaena fragrans is best propagated through stem cuttings.

### GROWTH

Dracaena fragrans, even in ideal conditions, is a slow grower.

### TOXICITY

The Corn plant is toxic.

If ingested it can irritate the throat, cause swallowing problems and more.

Keep away from children and pets.

### SOIL

Use loose, well-draining soil that is rich in organic matter.

### (RE)POTTING

Repot every other year into a slightly larger container.

### PESTS

Dracaena fragrans is known to be very pest-resistant. However, aphids, mealybugs or scale attacks may occur.

### FERTILIZER

During growing season, feed monthly using a balanced liquid fertilizer.

## COMMON PROBLEMS

**OVERWATERING:** Overwatering is the reason for most diseases that affect Corn plants. Watch out for fungal and bacterial diseases. Water with caution.

**PYTHIUM:** Pythium or water molds cause dead roots, yellow leaves, and wilting. Solution: Avoid waterlogged soil. Discard the infected leaves and stems.
